## 6" Intake Part Description

### HBI-65BT

This part is a 6" x 5" New Style Tee to be used to connect directly to 6" corrugated or dual wall tile and has a 5" inlet bell so that a 5" intake can be snapped directly into the tee without the use of adapter.

## Factoids and Tid-bits

Check out our adapters to increase or reduce the intake of the inlet off of the inlet tee.

## General Information for Installation Practices

### New Style Tees

1. A 6" tile bell may be fitted over a 6" SDR.35 bell or a 6" DR-C900 spigot.
2. An HBI-654 reducer may be used to connect a 6" intake tee to 6" field tile. The reducer will fit directly into the bell of the 6" tee.
3. A Hancor 6" x 5" reducer (product #FC-R05-06) and 6" x 4" reducer (product #FC-R04-06) both fit into a 6" intake tee bell.
4. Most 6" reducers work well with this product; however, a piece of 6" field tile may be needed to connect the tee to the tile.

### 6" Stacks

1. The spigot of a 6" stack may be fitted with all 6" SDR.35 bell end fittings.
2. In order to fit a 6" Schedule 40 bell over a 6" stack bell, the 6" stack bell will need to be cut below its rib.
3. A Fernco plastic adapter may be fitted to a 6" stack spigot. Please refer to NCS chart for further flow capacities.
